APPLE

Braeburn Apple: New, from New Zealand. Superb late season fruit: very crisp and tangy, more flavorful than Granny Smith. Excellent keeper. Green with dark red blush. October-November harvest. Chilling requirements = 700 hrs. Self fruitful. **M-III \$31.**

Fuji: Recent introduction from Japan that quickly became California's favorite apple. Sweet, very crisp and flavorful, excellent keeper. Dull reddish-orange skin, sometimes russeted. Ripe mid-September. Excellent pollinizer for other apple varieties. Chilling requirement apparently less than 600 hours. Self fruitful. **M-III rootstock or New Geneva \$31**

Gala (Original Gala): Wonderful dessert apple from New Zealand. Crisp, nice blend of sweetness and tartness, rich flavor. Skin reddish-orange over yellow. Early harvest, 2-3 weeks before Red Delicious. Good pollinizer for other varieties. 500 to 600 hours. Self-fruitful. **Semi-dwarf. On M-III or Apple \$31**

Granny Smith: From Australia. Large, late, green, all-purpose. Crisp, tart, excellent keeper. Requires long summer. Thrives in hot climates. 600 hours. Prolonged bloom: good pollinizer for other apples. Self-fruitful. **Semi-dwarf. On M-III \$31.**

Golden Delicious: Long-time favorite for its sweetness and flavor. Reliable producer, adapted to many climates. Pollinizer for Red Delicious. Mid-season harvest (September in Central Calif.). 700 hours. Self-fruitful. **Semi-dwarf. On M-III \$31.**

Honeycrisp: Winter hardy tree from the University of Minnesota. Fruit is crisp and juicy with an aromatic flavor. Striped red over yellow color. Stores well. Ripens from late September to late October. Pollinized by Gala, Granny Smith, Empire, McIntosh and Red Delicious. **Semi-dwarf. On M-III \$31.**

Mutsu: (Crispin). A favorite of connoisseurs: very large, crisp and flavorful. Pick when green or wait until partly yellow. Large, vigorous tree resists powdery mildew. 500 hrs. Pollinizer required: Fuji, Red delicious, Granny smith, and Gala. **On M-III \$31.**

Pink Lady: (Cripps Pink). Hot climate apple from Western Australia. Very crisp, sweet-tart, distinct flavor, good keeper. Skin reddish-pink over green when ripe. White flesh resists browning. Harvest begins late October in Central CA, about three weeks after Fuji. Self-fruitful. 400 to 500 hours. **Semi-dwarf. On M-III \$34**

Red Delicious: (Bisbee Spur) Sweet, crisp, flavorful — perhaps the best Red Delicious. Harvest in early fall. Small, compact tree. Good pollinizer for most other apples. 700 hours. Pollenized by Liberty, Granny Smith, Golden Delicious, Fuji, Gala. **Semi-dwarf. On M-III \$31.**

Yellow Newton Pippin: Yellow green, late, firm, crisp, slightly tart, superb flavor. For peak flavor and acid/sugar balance, wait to harvest until cheeks are blushed yellowish-green. Good keeper. Famous for cooking, excellent fresh or dried. Vigorous tree. Late Oct./early Nov. harvest. 700 hrs. Self-fruitful. **On M-III \$31.**

APRICOTS

Autumn Glo: Late season apricot with tremendous flavor. Ripens in the first two weeks of August in the Central Valley. Fruit is medium sized with good color. One of the highest scoring apricot varieties to date at Dave Wilson Nursery fruit tastings. 500 hours or less. Self-fruitful. **On Citation \$34**

Chinese (Mormon) Apricot: Cold hardy, frost hardy, sets heavy crops of small to medium size sweet fruit. Recommended for difficult climates prone to spring frosts. 700 hrs, self-fruitful. **On Citation \$34**

Harcot Apricot: From Canada. Frost hardy late bloom. Resists brown rot and perennial canker. Medium to large fruit with sweet, juicy, rich flavor - one of the best. 700 hrs, self-fruitful. **On Citation \$34.**

CHERRY

Bing Cherry: Large, firm, juicy, sweet, nearly black when ripe - superb flavor. The No.1 cherry. Mid-season. Large vigorous tree. Pollenized by: Black Tartarian, Van, Rainier and in colder climates, Stella . Estimated chilling requirement: 700 hours. **Mazzard \$31.**

Black Tartarian Cherry: Medium size, nearly black, sprightly flavor, early season. Vigorous, productive tree. 700 hours. Pollinizer required - interfruitful with most popular sweet cherries. **On Mazzard. \$31**

Craig's Crimson Cherry: Self-fruitful, natural semi-dwarf, perhaps the finest sweet cherry: dark red to nearly black, medium to large size, wonderful spicy flavor, very firm texture. Mature tree size about 2/3 of standard. Mid-season. Estimated chilling requirement: 800 hours. **On Maxma 14 \$36**

Rainier: Large, yellow with red blush. Sweet and flavorful - superior to Royal Ann. Very cold hardy. Mid-season harvest. Pollenizer required-interfruitful with Van, Lambert, Black Tart, Bing. Estimated chilling requirement: 700 hours. **Maxma 14 \$36**

Montmorency Cherry: Large, light red skin, yellow flesh. Perfect for cobblers, pies, etc. Extremely winter hardy. Very heavy bearing. 500 hrs. self-fruitful. **Mazzard \$32**

Stella Cherry: Self-fruitful - no pollenizer needed. Large, nearly black, richly flavored sweet cherry. Similar to its parent, Lambert. Late harvest. Pollenizes Bing, except in mild winter climates. Estimated chilling requirement: 400 hours. **New Root \$31**

NECTARINE

Arctic Queen White: Delicious, super-sweet white nectarine, very similar to Arctic Rose, but ripening 3-4 weeks later (early August in Central CA). Rich flavor and nice crunchy texture when firm ripe, extremely sweet when fully ripe. High-scoring in taste tests. 600 hrs. Self-fruitful. **Citation \$37**

Necta Zee Miniature Nectarine: Sweet, very flavorful yellow freestone, beautiful red skin. Mid-June to early July in central California. Vigorous growth to 6 ft. Best Self-fruitful, miniature nectarine. 400 hours or less. **Lovell \$35**

Mericrest: Very cold hardy, frost hardy, & late bloom. Crops after sub-zero winters. Large, red-skinned, yellow freestone with rich tangy flavor - very high scoring in taste tests. Highly recommended. Mid-July in central California. 800 hours. Self-fruitful. **Lovell \$30.**

Zee Glo: Taste test winner. Delicious late summer fruit with classic, zesty, nectarine flavor. Superb balance of acid and sugar. Attractive, dark red skin. Showy pink blossoms in spring. 600 hrs. Self-fruitful. **Citation \$37**

PEACH

Garden Gold Miniature Peach: Delicious yellow freestone, ripe 2 weeks after Elberta, more vigorous than other miniatures. Later bloom, less susceptible to frost damage. Showy blossoms. 5-6 ft. tree. Estimated chill requirement: 500 hours or less. Self-fruitful. (Zaiger) Lovell \$35.

Frost Peach: Resistant to peach leaf curl (10-year trials at Washington State Univ.). Delicious yellow freestone. Slight red blush over greenish yellow to yellow skin. Heavy bearing, excellent for canning or eating fresh. July harvest. Showy pink bloom in spring. 700 hours. Self-fruitful. Lovell \$37

Arctic Supreme Peach: Two-time taste test winner. Large, white flesh, nearly freestone when fully ripe. Red over cream colored skin. Sweet and tangy, fine delicate flavor, firm texture. Peak quality reached a short while after picking. Harvest late July/early August in Central Calif. 700 hours. Self-fruitful. Citation \$37

Indian Free Peach: Taste test winner. Large freestone, firm crimson and cream colored flesh. Tart until fully ripe, then highly aromatic with a rich, distinctive flavor. Highly resistant to peach leaf curl. Late season. 700 hours. Needs another nectarine or peach to pollenize. On Citation \$35

O'Henry Peach: Popular fresh market, yellow freestone now available for home planting. Large, firm, full red skin, superb flavor. Ripens early to mid-August in central Calif. Strong, vigorous, heavy bearing tree. 750 hours. Self-fruitful Citation \$35

Octoberfest Peach: On Citation. \$37

Gleason Early Elberta Peach: Also called Improved Elberta or Lemon Elberta. Reliable, frost hardy, yellow freestone for Utah and Pacific NW. Juicy, rich flavor. Harvest 10 days before Elberta. Can/freeze/fresh. 800 hours. Self-fruitful. St. Julian \$35

July (Kim) Elberta: Also called Early Elberta. Reliable heavy crops. Juicy, sweet, very flavorful yellow freestone fruit for canning, freezing, or fresh use. 400hrs. Self-fruitful. On Citation \$35

Snow Beauty White Peach: Taste test winner: one of the all-time, highest-scoring varieties in blind fruit tastings at Dave Wilson Nursery. Low acid, high sugar, tantalizing flavor. Large, very firm, attractive red skin. 750-850 hrs. Self-fruitful. Citation \$37

PEAR

Comice Pear: The gift pack pear. Sweet, aromatic, fine texture, superb flavor and quality - one of the best. Short neck, greenish-yellow skin with red blush. Late harvest. 600 hours. Self-fruitful in arid West or plant with Bartlett **On OHxF333 \$35**

Shinaeiki Asian Pear: Juicy, sweet, refreshing, crisp like an apple. Easy to grow. Keeps well. Harvest late July/early August. Bright yellow skin. Vigorous, heavy bearing (usually by the second year). Self-fertile. **On OHxF333 \$35**

Bartlett Pear: World's most popular pear. Early mid-season, high quality, tolerates hot summers. Estimated chill requirement: 500 to 600 hours. Self-fruitful in arid West. Elsewhere, pollinized by Bosc, D'Anjou, Winter Nelis. **On OHxF333 \$35**

Sensation Red Bartlett Pear: High quality, Bartlett type fruit with attractive red skin. Relatively small tree. 700 hours. Self-fruitful in the arid West. Elsewhere, pollinized by Bosc, D'Anjou or other pear. **On OHxF333. \$35**

Seckel Pear: Connoisseurs' favorite. Sweet, flavorful, aromatic, spicy...perhaps the best. Russeted brown skin. Resists fire blight. 500 hours. Self-fruitful. **On OHxF333 \$35**

Warren Pear: Excellent quality dessert pear - and highly resistant to fireblight. Medium to large, long-necked fruit with pale green skin, sometimes blushed red. Smooth flesh (no grit), is juicy and buttery with superb flavor. Good keeper. Cold hardy to -20°F. From Mississippi. 600 hours. Self-fruitful. **On OHxF333 \$35**

PERSIMMON

Fuyu - Jiro ("Apple Persimmon"): Medium size with a flat shape. Crunchy when ripe and non-astringent. Hardy, attractive tree. Fall harvest. 200 chilling hours. Self-fruitful. **On D. Lotus \$52**

Giant Fuyu: Larger, not so flat as Fuyu. Crunchy when ripe like Fuyu. Sweet, flavorful, non-astringent. Easy to grow, cool or hot climates. Fall harvest. 200 hours. Self-fruitful. **On D. Lotus \$52**

PLUMS

Beauty Plum: Sweet, flavorful plum, more widely adapted than Santa Rosa (more productive in cool, rainy climates). Red over yellow skin, amber flesh streaked red. Ripens June in central Calif. 250hrs. Self-fruitful. **On Citation \$35.**

Elephant Heart: Home-orchard favorite-large, heart-shaped fruit with sweet, juicy, richly flavored, firm red flesh. Dark reddish-purple mottled skin. Long harvest season - September in Central Calif. Hardy, heavy bearing. 500 hours or less. Pollenize with Beauty or Santa Rosa. **On St Julian \$37.**

Late Santa Rosa: Medium to large reddish-purple skin, red-streaked amber flesh. Tart-sweet with rich flavor when fully ripe. Harvest about one month after Santa Rosa. Estimated chill requirement: 400 hours or less. Self-fruitful. **Myrobalan. \$30.**

Stanley Prune: Large, dark blue skin. Juicy, sweet, delicious, greenish-yellow meaty flesh, freestone. Late summer harvest. Late blooming, extremely cold hardy and reliable. Self-fruitful. **On Citation \$35.**

PLUOTS

Flavor Grenade Pluot: Interspecific. Elongated green fruit with red blush. Crisp texture with explosive flavor. Taste test winner. Hangs on tree for 4-6 weeks. Pollinized by Flavor King, Dapple Dandy, Emerald Drop Pluot, or Santa Rosa plum. 300 -400 hours. **RIS Plum Yrig on Citatation. \$38**

Splash Pluot: Interspecific. Small to medium sized red-orange fruit with very sweet orange flesh. Round to heart shaped fruit is excellent eaten fresh, dried, or in desserts. Pollinized by Santa Rosa Plum or Flavor Grenade Pluot. 400 hours or less. **RIS Plum on Myro 20C. \$35**

NUTS

All-In-One: No.1 almond for home orchards. Heavy crops of soft-shell nuts with sweet, flavorful kernels. Hot summer required to ripen. 15 ft. tree, very winter & frost hardy. 300 to 400 hours. Self-fruitful. **Marianna Root \$36**

Colossal Chestnut: Bright golden foliage with rose-pink blossoms all summer! Huge, sweet nuts average 11-15 nuts per pound! Exceptionally high yields. Colossal is a cross between Asian and European chestnuts, and was developed specifically for delicious nuts that would produce on a reportedly blight resistant tree. Pollenized by other Colossal or Nevada. Grows 25-30' tall. 400-500 hrs. **\$55**

Nevada Chestnut: Pollenizer for Colossal - also a good producer. One Nevada can pollinize 8 to 10 Colossal trees. Not tolerant of alkaline soil. 400-500 hours. Pollenized by Colossal **\$55**

Eureka Walnut: Large, well sealed nut, light brown kernel of excellent quality. Self-fruitful or pollinize with Hartley. 600 hours. **On Paradox. \$55**

Robert Livermore (Red) Walnut: Unique red kernel. Growth characteristics are similar to the Chandler Walnut. This UC Davis introduction is self-fruitful. 700 hours. **On Paradox. \$55**

SPECIALTIES

4 in 1 Apple: Fuji, Gala, Golden Delicious and Granny Smith. **On M-III \$65.**

Fuji Espaliered Apple: 2-Tier. **On M-7. \$59**

4 in 1 Cherry: Rainier, Bing, Lapin, Van. **On Mazzard Stock \$65**

Cold hardy 4 in 1 Fruit Salad: Combination of one or more of the following Peach, Nectarine, Plum or Apricot. **On Citation \$69**
