APPLE

Braeburn Apple: New, from New Zealand. Superb late season fruit: very crisp and tangy, more flavorful than Granny Smith. Excellent keeper. Green with dark red blush. October-November harvest. Chilling requirements = 700 hrs. Self-fruitful. **M-III \$32.**

Cortland: Large, red apple derived from Macintosh. Favorite for eating, cooking and cider. Sweet-tart, flavorful, non browning white flesh. Hardy to -40. 800 chill hours. Self-fruitful. **M-III. \$34**

Fuji: Recent introduction from Japan that quickly became California's favorite apple. Sweet, very crisp and flavorful, excellent keeper. Dull reddish-orange skin, sometimes russeted. Ripe mid-September. Excellent pollenizer for other apple varieties. Chilling requirement apparently less than 600 hours. Self-fruitful. **M-III rootstock or New Geneva \$33.**

Gala (Original Gala): Wonderful dessert apple from New Zealand. Crisp, nice blend of sweetness and tartness, rich flavor. Skin reddish-orange over yellow. Early harvest, 2-3 weeks before Red Delicious. Good pollenizer for other varieties. 500 to 600 hours. Self-fruitful. **Semi-dwarf. On M-III \$32.**

Granny Smith: From Australia. Large, late, green, all-purpose. Crisp, tart, excellent keeper. Requires long summer. Thrives in hot climates. 600 hours. Prolonged bloom: good pollenizer for other apples. Self-fruitful. **Semi-dwarf. On M-III \$32.**

Golden Delicious: Long-time favorite for its sweetness and flavor. Reliable producer, adapted to many climates. Pollenizer for Red Delicious. Mid-season harvest (September in Central Calif.). 700 hours. Self-fruitful. **Semi-dwarf. On M-III \$32.**

Golden Russet: Crisp, aromatic, creamy yellow flesh with great flavor and legendary sugary juice. Used fresh and cider, drying and cooking. Late harvest. Skin partly to almost completely russeted. Winter hardy, vigorous tree with good disease resistance. 800-1000 chill hours. Partly self-fruitful. Biggest crops with cross pollination. **Semi-dwarf. On M-II \$34.**

Honeycrisp: Winter hardy tree from the University of Minnesota. Fruit is crisp and juicy with an aromatic flavor. Striped red over yellow color. Stores well. Ripens from late September to late October. Pollenized by Gala, Granny Smith, Empire, McIntosh and Red Delicious. **Semi-dwarf. On M-III \$32.**

King David: Medium sized, round fruit. Exterior color is yellow with red to orange blush and striping. Flesh is pale cream color, firm and crunchy. Flavor is balanced sweet and tart. This heirloom selection is good for fresh eating, sauce, baking and cider. Fruit harvests fall into winter. Excellent keeper. Pollination required with other mid to late season blooming varieties. Fuji, Granny Smith, Lady Williams and Pink Lady. 400-800 hours. **Semi-dwarf . On M-III \$32**

Mutsu: (Crispin). A favorite of connoisseurs: very large, crisp and flavorful. Pick when green or wait until partly yellow. Large, vigorous tree resists powdery mildew. 500 hrs. Pollenizer required: Fuji, Red delicious, Granny smith, and Gala. **On M-III \$32.**

Pink Lady: (Cripps Pink). Hot climate apple from Western Australia. Very crisp, sweet-tart, distinct flavor, good keeper. Skin reddish-pink over green when ripe. White flesh resists browning. Harvest begins late October in Central CA, about three weeks after Fuji. Self-fruitful. 400 to 500 hours. **Semi-dwarf. On M-III \$35.**

Red Delicious: (Bisbee Spur) Sweet, crisp, flavorful — perhaps the best Red Delicious. Harvest in early fall. Small, compact tree. Good pollenizer for most other apples. 700 hours. Pollenized by Liberty, Granny Smith, Golden Delicious, Fuji, Gala. **Semi-dwarf. On M-III \$32.**

Sierra Beauty: Favorite late apple in N. CA. Yellow with red blush. Rich, sprightly flavor, moderately sweet. Excellent fresh or cooked. Good keeper. 700-800 hours. **Semi-dwarf on M-III. \$34**

Yellow Newton Pippin: Yellow green, late, firm, crisp, slightly tart, superb flavor. For peak flavor and acid/sugar balance, wait to harvest until cheeks are blushed yellowish-green. Good keeper. Famous for cooking, excellent fresh or dried. Vigorous tree. Late Oct./early Nov. harvest. 700 hrs. Self-fruitful. **On M-III \$32.**

APRICOTS

Autumn Glo: Late season apricot with tremendous flavor. Ripens in the first two weeks of August in the Central Valley. Fruit is medium sized with good color. One of the highest scoring apricot varieties to date at Dave Wilson Nursery fruit tastings. 500 hours or less. Self-fruitful. **On Citation \$34.**

Brittany Gold: This sweet apricot is a very consistent producer in the test orchard. It has proven to perform in tough climates, where no other apricot will. This large, firm fruit has an extremely long season, hanging for 3 weeks or more at the end of July. Self-fruitful. **On Citation. \$37.**

Chinese (Mormon) Apricot: Cold hardy, frost hardy, sets heavy crops of small to medium size sweet fruit. Recommended for difficult climates prone to spring frosts. 700 hrs, self-fruitful. **On Citation. \$34.**

Harcot: From Canada. Frost hardy late bloom. Resists brown rot and perennial canker. Medium to large fruit with sweet, juicy, rich flavor - one of the best. 700 hrs, self-fruitful. **On Citation. \$34.**

Perfection: Very productive, hardy tree. Fruit is very large, sweet, and juicy. Performs well where spring frost is a problem! **On Citation. \$34**

CHERRY

Bing Cherry: Large, firm, juicy, sweet, nearly black when ripe - superb flavor. The No.1 cherry. Mid-season. Large vigorous tree. Pollenized by: Black Tartarian, Van, Rainier and in colder climates, Stella . Estimated chilling requirement: 700 hours. **Mazzard \$30.**

Black Tartarian Cherry: Medium size, nearly black, sprightly flavor, early season. Vigorous, productive tree. 700 hours. Pollenizer required - interfruitful with most popular sweet cherries. **On Mazzard. \$30.**

Craig's Crimson Cherry: Self-fruitful, natural semi-dwarf, perhaps the finest sweet cherry: dark red to nearly black, medium to large size, wonderful spicy flavor, very firm texture. Mature tree size about 2/3 of standard. Mid-season. Estimated chilling requirement: 800 hours. **On Maxma 14 \$37.** **Cherries continued next page...**

Lambert: Large, black and late harvest. Highest quality, rivaling Bing. Less susceptible to cracking due to later season. 800 hours. Pollenized by Van, Rainier, or Black Tartarian. **On Mazzard. \$30.**

Royal Rainier: Large, yellow with red blush. Sweet and flavorful - superior to Royal Ann. Very cold hardy. Mid-season harvest. Pollenizer required-interfruitful with Van, Lambert, Black Tart, Bing. Estimated chilling requirement: 700 hours. **On Mazzard \$30.**

Montmorency Cherry: Large, light red skin, yellow flesh. Perfect for cobblers, pies, etc. Extremely winter hardy. Very heavy bearing. 500 hrs. self-fruitful. **Mazzard \$32.**

Stella Cherry: Self-fruitful - no pollenizer needed. Large, nearly black, richly flavored sweet cherry. Similar to its parent, Lambert. Late harvest. Pollenizes Bing, except in mild winter climates. Estimated chilling requirement: 400 hours. **New Root-1 \$38.**

NECTARINE

Arctic Babe Miniature: A genetic, dwarf, white nectarine. Reliable, self-fruitful. Ripe in early June. 700 hours or less. **On Lovell. \$39.**

Atomic Double Red Flowering: One of the most intense blooms seen on a fruit tree! This medium to large, sweet, white nectarine ripens mid June in Central CA. 500 hours. Self-fruitful. **On Nemaguard \$34**

Double Delight: Sensational fruit. Consistently the best flavored, yellow nectarine. Double pink flowers. Dark red, freestone fruit is sweet with unusually rich flavor. 500 hours or less. Self-fruitful. **On Citation. \$35**

Necta Zee Miniature Nectarine: Sweet, very flavorful yellow freestone, beautiful red skin. Mid-June to early July in central California. Vigorous growth to 6 ft. Best Self-fruitful, miniature nectarine. 400 hours or less. **On Lovell. \$35**

Zee Glo: Taste test winner. Delicious late summer fruit with classic, zesty, nectarine flavor. Superb balance of acid and sugar. Attractive, dark red skin. Showy pink blossoms in spring. 600 hrs. Self-fruitful. **On Citation . \$37.**

PEACH

Garden Gold Miniature Peach: Delicious yellow freestone, ripe 2 weeks after Elberta, more vigorous than other miniatures. Later bloom, less susceptible to frost damage. Showy blossoms. 5-6 ft. tree. Estimated chill requirement: 500 hours or less. Self-fruitful. (Zaiger) Lovell \$31.

Frost Peach: Resistant to peach leaf curl (10-year trials at Washington State Univ.). Delicious yellow freestone. Slight red blush over greenish-yellow to yellow skin. Heavy bearing, excellent for canning or eating fresh. July harvest. Showy pink bloom in spring. 700 hours. Self-fruitful. Lovell \$37

Arctic Supreme Peach: Two-time taste test winner. Large, white flesh, nearly freestone when fully ripe. Red over cream colored skin. Sweet and tangy, fine delicate flavor, firm texture. Peak quality reached a short while after picking. Harvest late July/early August in Central Calif. 700 hours. Self-fruitful. Citation \$37

Indian Free Peach: Taste test winner. Large freestone, firm crimson and cream colored flesh. Tart until fully ripe, then highly aromatic with a rich, distinctive flavor. Highly resistant to peach leaf curl. Late season. 700 hours. Needs another nectarine or peach to pollenize. On Citation \$35

O'Henry Peach: Popular fresh market, yellow freestone now available for home planting. Large, firm, full red skin, superb flavor. Ripens early to mid-August in central Calif. Strong, vigorous, heavy bearing tree. 750 hours. Self-fruitful Citation \$35

Octoberfest Peach: Large, yellow-orange, firm, freestone with blushed red interior. Excellent true peach flavor. Ripens late season Sept.-Oct. 500-700 chill hours. Self-fruitful. On Citation. \$37

Gleason Early Elberta Peach: Also called Improved Elberta or Lemon Elberta. Reliable, frost hardy, yellow freestone for Utah and Pacific NW. Juicy, rich flavor. Harvest 10 days before Elberta. Can/freeze/fresh. 800 hours. Self-fruitful. Citation \$35

July (Kim) Elberta: Also called Early Elberta. Reliable heavy crops. Juicy, sweet, very flavorful yellow freestone fruit for canning, freezing, or fresh use. 400hrs. Self-fruitful. On Citation \$35

PEAR

20th Century Asian Pear: Juicy, sweet mild-flavored fruit is crisp like an apple. Keeps well. Easy to grow, heavy bearing, small tree. 300-400 hours. Self-fruitful or pollenized by Shinaeiki, Bartlett or other pear. **On OHxF333 \$35**

Shinaeiki Asian Pear: Juicy, sweet, refreshing, crisp like an apple. Easy to grow. Keeps well. Harvest late July/early August. Bright yellow skin. Vigorous, heavy bearing (usually by the second year). Self-fertile. **On OHxF333 \$35**

Bartlett Pear: World's most popular pear. Early mid-season, high quality, tolerates hot summers. Estimated chill requirement: 500 to 600 hours. Self-fruitful in arid West. Elsewhere, pollenized by Bosc, D'Anjou, Winter Nelis. **On OHxF333 \$35**

Bosc Pear: Long and narrow shape, brown skin. Superb quality. Harvest late Oct. Enjoy fresh or cooked. 500-600 hours. Pollenized by Bartlett or other pear. **On OHxF333. \$35**

Comice Pear: The gift pack pear. Sweet, aromatic, fine texture, superb flavor and quality - one of the best. Short neck, greenish-yellow skin with red blush. Late harvest. 600 hours. Self-fruitful in arid West or plant with Bartlett **On OHxF333 \$35**

D'Anjou Red Pear: Tastes similar to the green variety, but offer a stunning, deep red color. Sweet with just a taste of citrus. Flesh is cream to blush pink. Fresh eating, excellent poached, baked, grilled or in salads. Pollenized by Bartlett or Moonglow. 700-800 hours. **On OHxF333 \$35.**

Sensation Red Bartlett Pear: High quality, Bartlett type fruit with attractive red skin. Relatively small tree. 700 hours. Self-fruitful in the arid West. Elsewhere, pollenized by Bosc, D'Anjou or other pear. **On OHxF333. \$35**

Seckel Pear: Connoisseurs' favorite. Sweet, flavorful, aromatic, spicy...perhaps the best. Russeted brown skin. Resists fire blight. 500 hours. Self-fruitful. **On OHxF333 \$35**

Pears continued next page...

Warren Pear: Excellent quality dessert pear - and highly resistant to fireblight. Medium to large, long-necked fruit with pale green skin, sometimes blushed red. Smooth flesh (no grit), is juicy and buttery with superb flavor. Good keeper. Cold hardy to -20°F. From Mississippi. 600 hours. Self-fruitful. **On OHxF333 \$35**

PERSIMMON

Fuyu - Jiro ("Apple Persimmon"): Medium size with a flat shape. Crunchy when ripe and non-astringent. Hardy, attractive tree. Fall harvest. 200 chilling hours. Self-fruitful. **On D. Lotus \$55**

Giant Fuyu: Larger, not as flat as Fuyu. Crunchy when ripe like Fuyu. Sweet, flavorful, non-astringent. Easy to grow, cool or hot climates. Fall harvest. 200 hours. Self-fruitful. **On D. Lotus \$55**

PLUMS

Beauty Plum: Sweet, flavorful plum, more widely adapted than Santa Rosa (more productive in cool, rainy climates). Red over yellow skin, amber flesh streaked red. Ripens June in central Calif. 250hrs. Self-fruitful. **On Citation \$34.**

Elephant Heart: Home-orchard favorite-large, heart-shaped fruit with sweet, juicy, richly flavored, firm red flesh. Dark reddish-purple mottled skin. Long harvest season - September in Central Calif. Hardy, heavy bearing. 500 hours or less. Pollenize with Beauty or Santa Rosa. **On Citation \$34.**

Late Santa Rosa: Medium to large reddish-purple skin, red-streaked amber flesh. Tart-sweet with rich flavor when fully ripe. Harvest about one month after Santa Rosa. Estimated chill requirement: 400 hours or less. Self-fruitful. **On Citation \$34.**

Stanley Prune: Italian Plum. Large, dark blue skin. Juicy, sweet, delicious, greenish-yellow meaty flesh, freestone. Late summer harvest. Late blooming, extremely cold hardy and reliable. Self-fruitful. **On Citation \$35.**

Plums continued next page...

Weeping Santa Rosa Plum: One of most flavorful, aromatic, Japanese plums when fully ripe. Beautiful, 8-10 ft. tree with weeping growth habit. Easily espaliered. 200-400 hours. Self-fruitful. **On Myro 20C \$30.**

Wickson: Large, heart-shaped, greenish-yellow fruit. Very sweet, translucent flesh. Little or no tartness at skin or pit. Mid-season. Partly self-fruitful, or pollinated by Kelsey or Santa Rosa. 500 hours. **On Nemaguard \$27.**

PLUOTS

Flavor Grenade Pluot: Interspecific. Elongated green fruit with red blush. Crisp texture with explosive flavor. Taste test winner. Hangs on tree for 4-6 weeks. Pollenized by Flavor King, Dapple Dandy, Emerald Drop Pluot, or Santa Rosa plum. 300-400 hours. RIS Plum Yrig **On Citation. \$37**

Splash Pluot: Interspecific. Small to medium sized red-orange fruit with very sweet orange flesh. Round to heart shaped fruit is excellent eaten fresh, dried, or in desserts. Pollinized by Santa Rosa Plum or Flavor Grenade Pluot. 400 hours or less. RIS Plum on Myro 20C. **\$34**

NUTS

All-In-One: No.1 **almond** for home orchards. Heavy crops of soft-shell nuts with sweet, flavorful kernels. Hot summer required to ripen. 15 ft. tree, very winter & frost hardy. 300 to 400 hours. Self-fruitful. **Marianna Root \$36**

Carmelo Almond: Excellent pollinizer for Nonpareil. High quality kernels, well-sealed, and nut keeps well. Young trees set heavy crops. 400 hours. Pollenizer required. **On Paradox \$ 48**

Robert Livermore (Red) Walnut: Unique red kernel. Growth characteristics are similar to the Chandler Walnut. This UC Davis introduction is self-fruitful. 700 hours. **On Paradox. \$55**
